

### NOVOFLEX DOME FIR TREE MOUNT CLIP

Novoflex Dome Fir Tree Mount Clip can securely fix cable bunches to a panel or chassis, without the need of any fixing tool. You can simply mount the clip by pushing the anchor through a plate of specified Thickness, as per table below. The anchor fits perfectly into the hole of your chassis, providing a solid, rattle-free installation. While the domed anchor blocks out any space in the hole, the saucer-shaped structure below, Seals the hole, thus providing extra protection from the outer environment (dust, water, chemicals, etc.)

#### APPLICATION

Novoflex Part No.	Nominal Overall length L (mm)	B (mm)	Plate Thickness (mm)	Push Mount Hole Dia D (mm)	Max Cable Tie Width W (mm)
FMC - 01	13.5	15.7	0.7 - 3.0	4.5 - 5.0	5.2
FMC - 02	19	15.7	0.8 - 7	6.5 - 7.0	5.2
FMC - 03	26.7	20	4 - 11	9.5	8.0

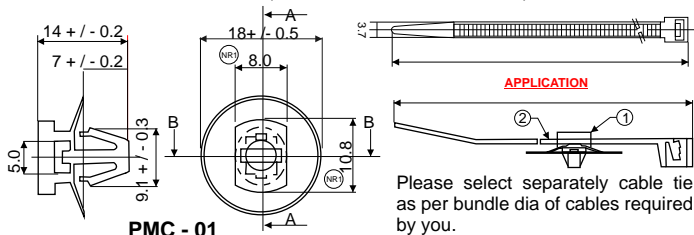

Material: Nylon 66. Standard Colour: Black

### NOVOFLEX DOME PUSH MOUNT CLIP

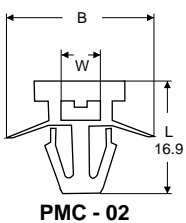

Novoflex Dome Push Mount Clip can securely fix cable bunches to a panel or chassis, without the need of any fixing tool. You can simply mount the clip by pushing the anchor through a plate of specified Thickness, as per table below. The anchor fits perfectly into the hole of your chassis, providing a solid, rattle-free installation. While the anchor holds the cable tie firmly to the chassis, the saucer-shaped structure below, Seals the hole, thus providing extra protection from the outer environment (dust, water, chemicals, etc.)

from the outer environment (dust, water, chemicals, etc.)

### NOVOFLEX PANEL EDGE CLIP CABLE TIE

This cable Tie comes along with an Edge-Clip. The metal teeth of the clip strongly bite into the panel (without damaging it), thus providing with a solid grip. No separate tools are required for installation. The Cable Tie can easily slide across the clip, thus adjusting its position as per your need. It is ideal for places where adhesive strips, drilling of holes, or screws cannot be used.

Novoflex Part No.	CABLE TIE			CLIP		
	length (mm)	Width (mm)	Thickness (mm)	Height H (mm)	Width W (mm)	Max Panel Thickness (mm)
PEC - T	200	10.6	3.2	1.5	5	1 - 3
